Renewed Cable Lugs

Correct Lugs for Correct Jaws

Kardeş Elektrik San. Tic. A.Ş. which has been operating in electricity industry for more than 55 years, initiated Cable Lugs manufacturing in its new manufacturing plant in 2017.

Our quality understanding on which we never compromise since we set off on this journey increases every year.

We aim to produce reliable, high quality Cable Lugs, in addition to rotarty switches, carbon brushes, brush holders and starter solenoids.

Kardeş Cable Lugs are manufactured from 99,95% Cu-ETP electrolytic copper in conformity with EN 13600 requirements. Our standard production ranges between 10 mm² to 400 mm² in different profiles and metric measures. Our terminals are designed especially for optimum electrical conductivity values. We welcome any additional customer requirements.

"Kardeş Elektrik has introduced "**Correct Lugs for Correct Jaws**" approach, recommends using clamping jaws that are produced according to industrial standards. We will be pleased to help you with correct product selection.

Kardeş Cable Lugs which we developed taking customer requirements into consideration are reachable thanks to our widespread dealer network and sales offices across Turkey In abroad, in order to satisfy your needs with competitive prices and high quality standards.

- All of our products are produced from Electrolytic Copper (Cu-ETP) pipes and coated with tin.
- Our company reserves the right to make changes in product measures without prior notice.
- You can contact us for suitable clamping jaw selection.
- Production suitable to your different requirements and measures can be made.
